

Bubbles (Improv Applique)
Exchange at May meeting

Use any applique method to make a block!

Add some circles to a LIGHT BLUE background,
and trim to 8 ½”.

Circles can be any size or color! I find that odd numbers are
more interesting, but that is a subjective design principle.

Applique tips:

- Start with a fabric square slightly larger than the finished size (9-10”), and trim AFTER applique shapes are sewn.
- Use any method. I like Raw-Edge Applique: cut circles freehand, then put a dab of glue to hold them in place while sewing along the edge with a straight stitch.
- Other options are buttonhole stitch or zig-zags. I’m sure you can find online tutorials for turned edge applique.
- Anyone like making yo-yos? That would give the blocks a cool 3-dimensional look!
